Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Lyden (5843268) or Aguerre (6237249).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 4-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueno (4309376) in view of either Aguerre (6237249), Koh (5862614), or Harrison (2002/0116843).

Ueno shows a shoe sole and the method of making such from two materials with the same elasticity and hardness (column 2 lines 50-70) substantially as claimed except for the exact pattern of the two materials. Aguerre, Koh, or Harrison show different patterns for soles of footwear which include a first material having a plurality of extensions and another material forming a plurality of discrete sections. It would have been obvious to form the shoe sole of Ueno with a pattern such as those taught by Aguerre, Koh, or Harrison to allow the footwear to have a desired appearance.
